

Rcpp::internal::operator<

```
graph LR; A[Rcpp::internal::operator<] --> B[Rcpp::internal::string_proxy::begin]
```

A diagram showing a call to `Rcpp::internal::string_proxy::begin`. On the left, a gray rectangular box contains the text `Rcpp::internal::operator<`. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text `Rcpp::internal::string_proxy::begin`.

Rcpp::internal::string  
\_proxy::begin
