

```
Rcpp::sugar::Lazy<  
  Rcpp::traits::storage  
_type< RTYPE >::type,  
Sum< RTYPE, false, T > >
```

```
Rcpp::sugar::Sum< RTYPE,  
  false, T >
```

```
graph LR; Sum[Rcpp::sugar::Sum< RTYPE, false, T >] --> Lazy[Rcpp::sugar::Lazy< Rcpp::traits::storage_type< RTYPE >::type, Sum< RTYPE, false, T > >];
```

A blue arrow points from the Sum box to the Lazy box, indicating that Sum is a specialization of Lazy.
