

Rcpp::Vector::import
_transform

```
graph LR; A[Rcpp::Vector::import  
_transform] --> B[Rcpp::Vector::Vector]; B --> C[Rcpp::Vector::init];
```

The diagram illustrates a sequence of three Rcpp::Vector operations. The first operation, 'Rcpp::Vector::import_transform', is highlighted in a grey box. It is followed by 'Rcpp::Vector::Vector' and 'Rcpp::Vector::init', which are in white boxes. Arrows indicate the flow from left to right between these operations.
