

```
Rcpp::sugar::Or_LogicalExpression  
_LogicalExpression< LHS_NA,  
LHS_T, false, RHS_T >::size
```

The diagram illustrates a function call. A grey rectangular box on the left contains the code for `Rcpp::sugar::Or_LogicalExpression` and its `size` method. A straight blue arrow points from this box to a white rectangular box on the right, which contains the code for `Rcpp::VectorBase::size`. A curved blue arrow loops back from the right box to itself, indicating a recursive or self-referential call.

```
Rcpp::VectorBase::size
```
